Adding new functionality to my midterm project

- Make venue flip puzzle more interactive with additional puzzles as a list :
 - **Filtering & Sorting**: allowing users to filter projects by themes (elegant, ranch, church) tags.
 - Possibly adding animations when items are filtered in and out.
- Change flip puzzle into actual correct—not correct puzzle (drag and drop)
 - i.e. if 1 == box1: correct
- Thematic change (dark-mode style)
- Buttons to fill in like water-like but on hover

Color Scheme for “dark mode”

Buttons

- <https://www.zachjordan.io/>
- Liquid Fill Button Hover Effect:
